

AMG LANKA GROUP

SOFTWARE ENGINEERING STUDIO · HIKKADUWA, SRI LANKA

About the Studio

AMG Lanka Group is a software engineering studio based in Hikkaduwa, on Sri Lanka's south coast. We design and build web platforms, booking systems and business software — the kind of work that has to hold up under real customers, not just a demo day. Alongside development, we run digital marketing for the brands we build for. Founded by Praveena Gunasekara, AMG Lanka Group also owns and operates its own group companies, including Gunasekara Travels, so our software is tested against real operations before it ever reaches anyone else.

What We Do

Web Platforms	Booking systems, customer portals and marketing sites.
Business Software	Order management, POS and back-office systems.
Desktop Applications	Purpose-built, reliable on-site desktop tools.
UI / UX Design	Interfaces designed around real user needs.
Digital Marketing	SEO, social media and campaign support.

Selected Work

SL Travel Buddy	Passenger app for inter-city bus travel: seat booking, live tracking, route search.
Diamond Web Service	Storefront and catalogue platform for a diamond and jewellery retailer.
Food Recipe	Multilingual recipe platform: English, Sinhala and Tamil.

Technology

Java & Spring Boot · React & MERN Stack (Node.js, Express, MongoDB) · MySQL · JavaFX · Python, TensorFlow & PyTorch for AI/ML · REST APIs · Git & Docker

The Team

Praveena Gunasekara	Founder & CEO
Thushal Eranga	CTO · Software Engineer
Oshan Udeesha	CPO / Designer · Software Engineer
Chamod Vishmina	CMO / COO · Software Engineer
